Mira Miranda is a wish to give the mirror itself another role and, through this paradox, to draw attention to something else. On the one hand, it would like to emphasize the material—what does an ash tree actually look like?—and on the other hand emphasize that appearances are important, but are not everything. Perspective is just as important...

Mira Miranda is a mirror intended for an entrance hall or the bathroom or even the bedroom. The wooden dish serves as a receptacle for jewellery or small accessories.
