

## Billy the KIT

Supermarkets today contain aisles of cleaning materials many metres long, all promising cleaning in seconds. Certainly attractive, but being able to clean quickly unfortunately often involves a cost to our environment and health.

The kit can be used to mix up a versatile cleaning fluid for bathroom and toilet from just a few basic ingredients; it is naturally environmentally friendly and has no impact on health.

KIT contains: Sandblasted bottle with spray head, vinegar, sodium bicarbonate and soft soap

Information brochure

Size: 17 x 23.5 x 11 (l x w x h)

Put together in Switzerland
